

6/20/19

THE MEDICINES-the good, the bad and the upset stomachs

Pulmonary Fibrosis Support Group

Pulmonary fibrosis is currently not curable, but it is treatable. Whether you are on therapy for IPF or ILD we have options available but as many of you know sometimes the treatment can be a little tough to manage.

So, this month let's talk medicine. And side effects.

We will have Clinical Nurse educators to speak about the IPF therapies and Kelley Sanzen, Pharm-D from Brown Medicine to discuss the ILD therapies.

Please join us on **June 20th (Thursday) from 1:30PM-3:00PM** at the **Brown/University Medicine building in East Providence**. Patients and caregivers welcome!

Light refreshments provided.

Please RSVP via email by **6/14/19** (RSVP NOT required just helpful to plan refreshments)

rihpulmonaryfibrosis@lifespan.org

Hosted by the Brown Medicine and Rhode Island Hospital Interstitial Lung Disease Program, a member of the **Pulmonary Fibrosis Foundation Care Center Network**. Supported by the Pulmonary Fibrosis Foundation.

**Join us for the
