There is power in knowledge

We are all on the same road with the same destination whether we suffer from a chronic disease or not however, there may come a time where we hear “sorry there is nothing more we can do” a little sooner than others. For some, knowledge and planning can be empowering and give peace of mind not only for ourselves but also for our loved ones. Let’s delve deep this time and talk about advanced directives, palliative care, and hospice with **Dr. Gregory Rachu** from Hope Health Hospice.

● **Thursday March 21st 2019 1:30 PM-3 PM**

● **Brown Medicine, 375 Wampanoag trail East Providence, RI 02915**

Please RSVP via email by 3/15/19 (RSVP NOT required just helpful to plan refreshments)
