

# 5/16/19 TRANSPLANT AND DONATION

## Pulmonary Fibrosis Support Group

Transplant is a small word with big implications. Roughly 2,000 people a year receive a lung transplant and of those 2,000 people around half have pulmonary fibrosis. Medically and/or personally transplant is not an option for everyone, but it is the only advanced therapy for end stage fibrosis.

So, this month let's talk transplant.

We will have Craig Tucker from New England Donor Services with us to talk about what donation means and the relationship with organ donation that transplant recipient's experience. We are also lucky to have Don Callen attending to provide insight on the recipient experience.

Please join us on **May 16<sup>th</sup> (Thursday) from 1:30PM-3:00PM** at the **Brown/University Medicine building in East Providence**. Patients and caregivers welcome!

Light refreshments provided.

Please RSVP via email by **5/10/19** (RSVP NOT required just helpful to plan refreshments)
