## **LET'S STUDY THE STUDIES!**

### **Pulmonary Fibrosis Support Group**

Clinical trials are the primary way that researchers find out if a new treatment, like a new drug or diet or medical device is safe and effective in people. Ever wonder what being apart of a clinical trial is like and how they work? Then join us this month as we talk about the nuts and bolts of research studies with our very own **Dr. Barry Shea** and our Lifespan clinical research assistant **Aidan Burke**.

**October 17<sup>th</sup> (Thursday) from 1:30PM-3:00PM** at the **Brown/University Medicine building in East Providence**. Patients and caregivers welcome!

Light refreshments provided.

Please email with any questions:
